

WCF World Team Rankings

Introduction

The World Team Rankings for Association and Golf Croquet are derived from the World Individual rankings. They imply the overall level of success of players from a WCF member association together with a measure of the development status of that member.

Purpose

The compilation of the World Team Rankings does not in itself convey any special privileges but is designed to foster a competitive spirit at International level, across all events. In addition, it can be used as a measure of the development in a particular member association by indicating the overall standard and number of players competing on a regular basis.

Why Six Players?

The number six is not entirely arbitrary. It is based on the [MacRobertson Shield](#) team composition that is recognised by the WCF as The World Team Championship for Association Croquet.

Want to know more?

A much more complete explanation of the rankings is available from the WCF website for those who are interested: <http://www.wcfcroquet.org/index.php>

<u>World Team Rankings</u>		
As at 23rd January 2008
